

Crafted from square steel rods and finished in black, silver or brass, Fulham's frames are both sleek and striking in appearance.

The tops are uniquely sand-casted in aluminium and finished in an antique brass or nickel effect. Also available are sheet steel tops in either light blue or light green finishes. And to complete the selection there is a white Banswara marble variant.

The lower shelves as well as the small table tops are made from sheet steel and available in a pebble, a sky blue, a light grey or a sea green finish.

With the contrasting nature of the two finishes on each piece, the pieces of furniture are unique in both their visual appearance and appeal.

They make a subtle and tasteful design statement in a variety of interior schemes.

Practical in form yet visually attractive, the Fulham collection complements well with other looks in the home and surely enhances any living space.
